ABOUT GULF INTERVENTION SOCIETY

The Gulf Intervention Society is a non-Profit organization established at a time when the success of Gulf interventionists has been growing regionally and globally. the main aim of its composition was to gather efforts and opinions towards nominal goals that serve us as public, states and health care professionals for scientific, research and societal compatibility.

GIS's mission is to lead the Gulf interventional cardiovascular community through education, research, and quality patient care. To fulfil that mission, GIS recognizes its responsibility to promote the highest possible educational levels, research tools, community interactions and ethical behavior by its members.

The group, which is part of the Gulf Heart Association, met to encourage national and regional interventionists to join the society and welcome their addition and participation.
